PROFESSIONAL SUMMARY

Java Backend Developer with a strong foundation in Core Java, Spring Boot, Spring Security, RESTful API design, and JPA/Hibernate, built through hands-on projects covering secure authentication, layered architecture, and production deployment. A fast, self-driven learner who actively leverages modern AI-assisted development tools (GitHub Copilot, ChatGPT, prompt engineering) to accelerate coding, debugging, and documentation — reflecting comfort working alongside AI-native workflows that today's engineering teams increasingly rely on. Solved 400+ DSA problems on AccioJob & LeetCode, demonstrating solid problem-solving and algorithmic thinking. Genuinely curious about new technologies, quick to pick up new tools, frameworks, and codebases, and enjoys collaborating with new people and teams. Looking to start a career as a Java Backend Developer and grow into a well-rounded, AI-fluent full-stack engineer.

TECHNICAL SKILLS

Languages: Java (Core, Collections, JDK 8-17), SQL, JavaScript, HTML5, CSS3

Frameworks: Spring Boot, Spring MVC, Spring Security, Hibernate ORM, Spring Data JPA & React JS

Database: MySQL - schema design, query optimization, CRUD operations, JPA-based persistence

API & Backend Practices: RESTful API design, layered (Controller-Service-Repository) architecture, global exception handling, input validation, role-based authorization, pagination & filtering

AI-Augmented Development: GitHub Copilot, ChatGPT / prompt engineering for code generation, debugging & documentation, AI-assisted frontend generation, quick adoption of AI developer tooling

Tools & Platforms: Git, GitHub, Postman, Maven, IntelliJ IDEA, Swagger UI, Apache Tomcat

Deployment: Render (Backend), Vercel (Frontend)

Problem Solving: 400+ DSA problems solved on LeetCode / AccioJob platform

Currently Exploring: Docker basics, microservices concepts, and Spring AI / LLM-integration patterns to stay aligned with current industry direction

PROJECT EXPERIENCE

EasyTrip - Cab Booking Backend Application [\[GitHub\]](#) [\[Live Demo\]](#)

Spring Boot | Spring Security | REST API | JPA/Hibernate | MySQL | Render + Vercel

- **End-to-end ownership:** designed and deployed a full-featured cab booking REST API with complete CRUD operations, session-based authentication, and role-based authorization for Customer, Driver, and Admin roles.
- **Security & robustness:** implemented ownership-based access control, Principal-based '/me' APIs, global exception handling, request validation, and pagination & filtering for scalable data access.
- **Core booking lifecycle:** built cab registration, booking creation, enum-based status tracking, and automated email notifications end to end.
- **AI-augmented workflow:** used AI coding assistants to speed up boilerplate generation, debugging, and API documentation, and integrated the Spring Boot backend with an AI-generated frontend - reflecting a practical, tool-forward development approach.
- **Clean architecture & delivery:** followed layered architecture best practices and independently deployed the backend on Render and frontend on Vercel.

Hospital Management System [\[GitHub\]](#)

Java Servlets | JDBC | MySQL | JSP | MVC | Apache Tomcat

- Built a role-based web application with Patient, Doctor, and Admin modules for appointment scheduling, following the MVC pattern with a JSP + Bootstrap UI, deployed on Apache Tomcat.

Product Management System - CRUD Web App [\[GitHub\]](#)

Spring MVC | Spring ORM | JPA | MySQL | JSP | JSTL

- Developed a full CRUD product management application using Spring MVC, JPA, and MySQL with a JSTL-based JSP UI, demonstrating clean MVC architecture and ORM-based data persistence.

INTERNSHIP EXPERIENCE

Java Backend Developer Intern | NativeSoftTech (Remote)

April 2025 - May 2025

- Completed a one-month remote internship applying Core Java and OOP concepts to real backend development tasks.
- Collaborated remotely with a new team, quickly ramping up on unfamiliar codebases and delivering assigned tasks within set timelines.
- Worked on MySQL schema design and query optimization, improving database response time and application performance.
- Gained hands-on exposure to debugging, problem-solving, and the full software development lifecycle.

EDUCATION

MCA - Master of Computer Applications (72.1%)

2024 - 2026

AKTU, Lucknow - strong foundation in software development, data structures & algorithms, database management, computer networks, and scalable application development.

B.Tech - Civil Engineering (83%)

2017 - 2021

AKTU, Lucknow - strong analytical and structural thinking foundation; completed industrial training in Road Pavement Design.

CERTIFICATIONS & ACHIEVEMENTS

- Java Full Stack Development - AccioJob (Pursuing, Expected Completion: August 2026)
- Java Bootcamp, JavaScript Bootcamp, HTML & CSS - Let's Upgrade
- Spring Boot - Scaler Academy | Git & Java Hibernate - Simplilearn
- 400+ DSA problems solved on LeetCode / AccioJob platform - strong coding fundamentals
